TOP STORY: TEEN DRUGS

1. What drug use in the U.S. is raising the most concern? Using statistical and demographic information from the video report, have student teams create a written and/or graphic profile of the typical drug user in the U.S. today.
2. As stated in the video report, "Drugs aren't only a social issue. They're a huge medical problem." Brainstorm a list of medical impacts caused by drug use. Group students and have

each group contact one medical facility/agency to gather statistical and anecdotal information on the medical impact of drug abuse in your community. Have groups share findings and then create a class product that reflects the essence of the groups' findings. Share these with the school community.

SCIENCE DESK: HEAT ISLAND

3. Ask students to describe the effect scientists are calling "heat islands." How are they formed? What absorbs and retains heat? How do "heat islands" contribute to urban pollution? Have students verify this phenomenon by comparing changes in temperature with changes in population in a nearby metropolis. Using on-line resources, have student teams a) investigate ways to offset this effect and b) create a design/model for a local urban community to mitigate against the "heat island" effect.

WORLDVIEW

TOP OF THE WORLD: GREATER CHINA

4. Explain how social/economic factors have led to the evolution of "Greater China." How do Hong Kong and Taiwan play a part in this emerging "global superpower"?

5. Have each student group research to determine one potential investment opportunity in China. (EX.: It takes almost six months to get telephone installation in China, so many people are buying cellular phones. Buying stock in an international company that provides cellphone service might be a good investment.) Have each group present its investment idea and discuss the social, political and economic factors that present potential for profit and risk for such an investment in China.

POLITICAL FRONT: CHE GUEVARA'S REMAINS RETURN TO CUBA

6. What is significant in the return of Che Guevara's remains to Cuba? How might the Cuban government capitalize on the October entombment of his remains as a politically significant event?

TOP STORY: LINE-ITEM VETO

1. What is a "line-item veto"? Review with students the "checks and balances" among the three branches on government created by the U.S. Founding Fathers. Why might some in Congress feel that this veto gives the president too much power?
2. Have students in small work groups use texts/other resources to find information about a) "riders" to legislation and-b) when presidents have exercised their veto power. Have groups share their findings and then discuss/debate whether or not the line-item veto gives a president undue advantage over Congress.

ENVIRONMENT DESK: GREENHOUSE GASES

3. What is the "greenhouse effect" and what are its potential impacts? Have students list those discussed in the report and the kinds of human activities that contribute to it. Group students. Using on-line resources, have them extend both lists and gather suggestions about how local and national communities can help reverse this trend. Share and discuss what students perceive to be the most logical and responsible actions. As a class, draft a letter to your local representatives based on students' suggestions.
